JOHNI RING® Specialized Wax Gaskets

Date: August 2017

Johni-Ring wax gaskets provide a permanent, sanitary, gas and watertight seal on most types of water closets. Constructed of high-quality golden wax, **Johni-Rings** will not dry out, harden, or deteriorate. Each wax ring is carefully extracted from its mold and packaged in an exclusive all-weather, non-stick plastic wrapper for easy removal and installation. **Hercules** sturdy polypropylene horn has full downward extension to eliminate splash-backs - ensures positive, non-interrupted flow through the floor flange.

Johni-Ring Jumbo has 40% more wax than the standard **Johni-Ring** – for applications where the floor flange is excessively recessed. Eliminates the need for “double stacking.”

Johni-Ring for Urinals - felt reinforced, 2" diameter for most wall-installed urinals. Can be used on cast iron, copper or plastic fittings.

Johni-Ring for Back Outlet Toilets – felt reinforced, fits most 4" wall toilets.

Johni-Ring Combination Packs – contain both the wax gasket and a set of either **Johni-Bolts** or **Johni Quick Bolts®**.

APPROVALS & LISTINGS

Meets Federal Specifications TT-P-1536A

SPECIFIC USES

Wax gasket rings for sanitary seal for floor mounted, back outlet toilet drainage fittings and urinals.

SPECIFIC APPLICATIONS*

Designed to work with all types of installations such as cast iron, copper and plastics.

*For special applications which may not be covered on this or other Oatey literature, please contact Oatey Technical Services Department by phone 1-800-321-9532, or fax 1-800-321-9535, or visit our technical database web-site at www.Oatey.com.
