To remove an Expander Head, unscrew from tool in a counter-clockwise direction.

Be sure Expander Head is free of any dirt and debris.

Use a clean, lint-free cloth to apply a thin coat of **Milwaukee Expander Cone Grease, No. 49-08-2400** to cone of Spindle (37). Do not over-lubricate.

See page 3 for additional lubrication notes.

Reinstall Expander Head onto tool in a clockwise direction. Hand tighten securely. Do not over tighten. The Expander Head must fit snugly against the shoulder of tool.

LUBRICATION NOTES:

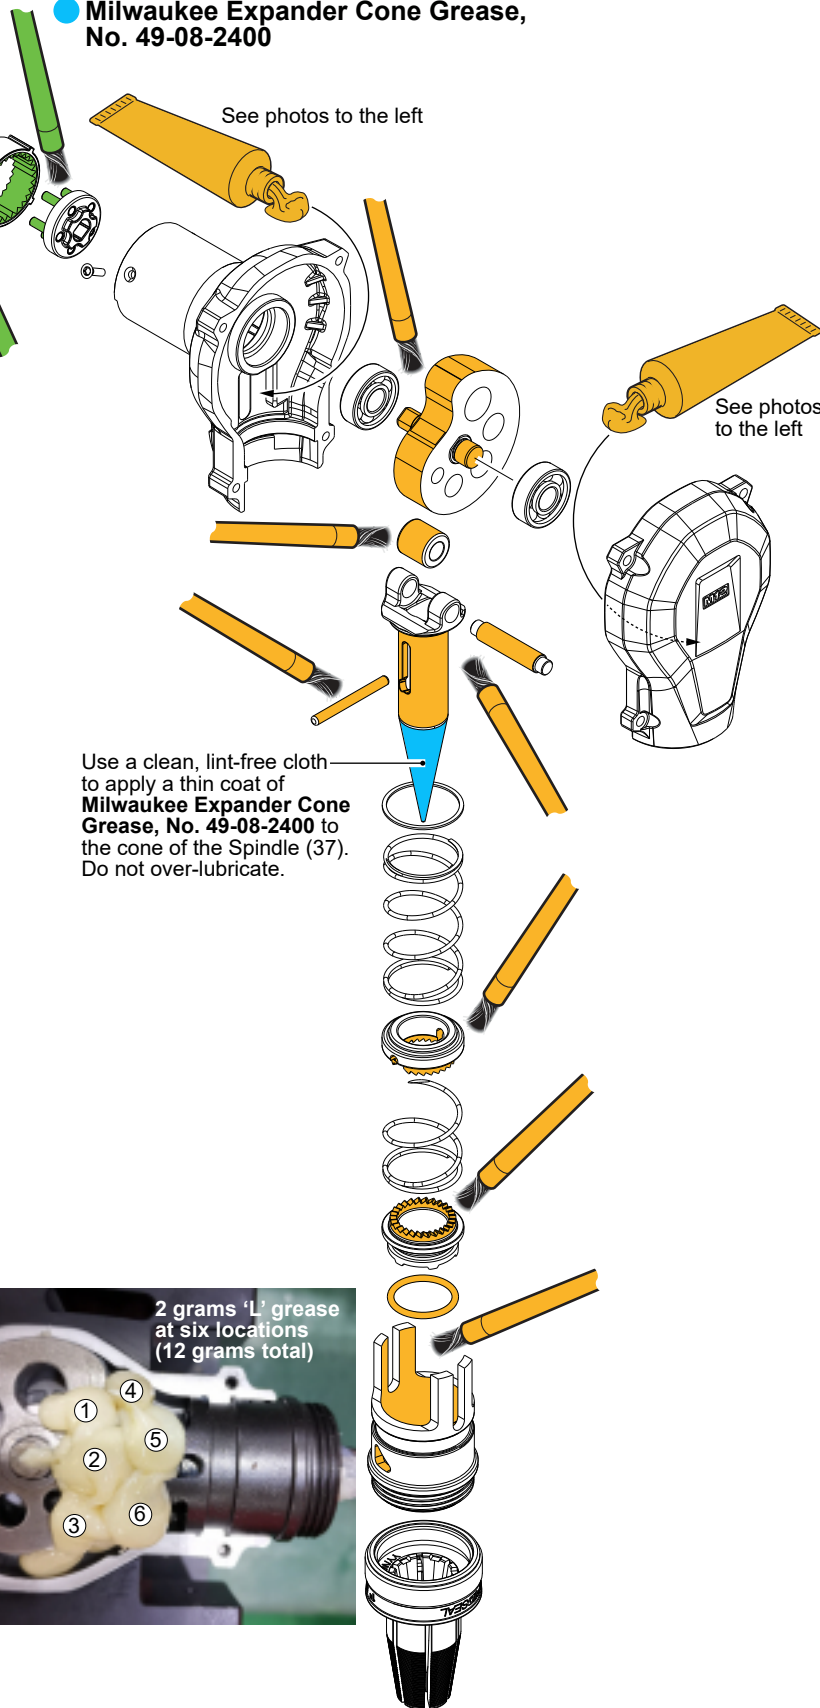

- **Type 'J' Grease, No. 49-08-4220** (1 lb. can)

NOTE: When servicing, remove 90-95% of the existing grease prior to installing Type 'J'. Original grease may be similar in color but not compatible with 'J'. Prior to reinstalling, clean gear assemblies with a clean, dry cloth. Lightly coat all individual parts highlighted here with grease. Apply a greater amount of grease to all internal and external gear teeth.

- **Type 'L' Grease, No. 49-08-4175** (1 lb. can)

NOTE: When servicing, remove 90-95% of the existing grease prior to installing Type 'L'. Original grease may be similar in color but not compatible with 'L'.

- **Milwaukee Expander Cone Grease, No. 49-08-2400**

NOTE: Be sure to place all components of the Electronics Assembly (64) firmly and squarely in Left Housing Halve-Support (55). Be sure to route wires into wire traps as shown. Check for any interferences prior to installing the Housing Cover (51).
